SUMMARY

I am a Computer Science student with experience in software development, data analytics, SQL, and web development. Experienced in building data solutions, analyzing large datasets, and developing software to support business decision making. I am very interested in video game development, game engines, startups, and building innovative software products that solve real world problems. I have strong problem solving skills with experience working both independently and as part of collaborative development teams.

WORK EXPERIENCE

Lakrids by Bulow

Data and analytics intern **Jan 2026 - April 2026**

- Analyzed marketing campaign data using SQL and BigQuery to help the marketing team understand campaign performance and make data driven decisions.
- Built and maintained SQL views and data models that transformed raw marketing data into accessible, usable datasets for reporting and analysis.
- Developed a forecasting algorithm to predict the future value of advertising campaigns and estimate expected revenue from ongoing ad spend.

Epal

Web developer **2022-2024**

- Developed and implemented new web application features in collaboration with a remote development team.
- Debugged and resolved software issues to improve application functionality and reliability.
- Worked with team members to test, review, and integrate code changes into the application.

EDUCATION

Bachelor of Computer Science **2024 - Expected May 2027**

Wentworth Institute of Technology

Relevant coursework: DATA STRUCTURES, NETWORK PROGRAMMING, ALGORITHMS, OPERATING SYSTEMS, PARALLEL COMPUTING, APPLICATIONS OF AI, SOFTWARE ENGINEERING, 3D GRAPHICS PROGRAMMING

Bachelor of Computer Science **2023 - 2024**

Reykjavik University

Relevant coursework: SOFTWARE REQUIREMENTS AND DESIGN, DATABASES, WEB PROGRAMMING

Summer Program in entrepreneurial studies **Summer 2023**

Columbia University

TECHNICAL SKILLS

- Languages: Python, C++, Java, JavaScript, SQL, F#, Prolog, Swift
- Web & Software: React, Next.js, Node.js, REST APIs, Git
- Data: BigQuery, Looker, PostgreSQL, Supabase, Data Analysis
- Game Development: Godot, OpenGL, ImGui, Unity
